

Why use an online assessment centre platform?

An online assessment centre platform will present your candidates with an engaging, realistic preview of their role at your organisation whilst also helping to reduce the administrative burden of your AC's. No paperwork or printing means it's better for the environment too.

Why use Talentsift's solution?

The Talentsift software provides a beautifully designed, easy-to-use and personalised online platform for assessment centre exercises. The attractiveness and user friendliness of the interface can significantly influence candidates' perception of the process and your brand. Assessments conducted on the Talentsift platform closely resemble a day in the office, making the assessments a more natural experience.

Features

Affordable

With Talentsift you pay per assessment centre version uploaded to the platform, irrespective the number of candidates tested or number of positions filled. Your licence lasts for one year, but remember: your first assessment centre upload is free!

Simulated Email Inbox

Distribute background materials for exercises in the form of emails that can be scheduled to arrive in candidate's inboxes throughout the day. Test a candidate's ability to deal with unexpected new information or requests by dropping in some new information midway through the event.

Off-the-shelf or Bespoke Exercises

We can adapt and load your existing assessments into the platform or we can provide the content for you. Choose our off-the-shelf assessment for graduate-level roles or order bespoke content from our in-house occupational psychologist.

• Customisable Look

The recruitment and selection process is part of a company's brand. Integrate your logo or other corporate design elements into the platform and even into the assessment content itself.

• Scheduling Calendar

Communicate deadlines, display the agenda or provide location information ('Go to Room 205 for the interview') via a simple and powerful calendar widget.

• Image and Video Embed

Take full advantage of migrating your assessments online: use colourful images and embed corporate videos for a more realistic and diverse background brief.

• Flexible In-Tray Exercises

Build complex written exercises by having candidates create lists of important issues, describe priorities or compose memos to a manager.

• On-The-Fly Modifications

False fire alarm at the assessment venue? Assessors running late? You can easily re-schedule exercises with a few clicks and the changes are propagated to candidate's screens in an instant.

• Remote Evaluation

Save time and money by reviewing and scoring written responses remotely. Submitted answers are stored in the cloud and assessors can access them within seconds.

Contact us for details and pricing. First assessment always free.
